ORCID: 0000-0002-5889-0670

[May 2025]

Experience

- 2021 – Present  **Research fellow. Department of Genetics, Evolution and Environment. University College London. UK**
Research fields: *Population Genomics; Evolutionary Biology; Ancient DNA; Pathogens and host plant interactions*
- Oct 2024 – Present  **Consultant. Royal Botanic Gardens, Kew. UK**
Project: *Fungarium Sequencing Project*
- Jan 2024 – Present  **Selection Committee for the "GGLatAm2024" initiative. Get Genome Genomics for all. UK**

Education

- 2016 – 2020  **Ph.D. in Biology. Max Planck Institute for Biology & University of Tuebingen**
Thesis title: *Phylogenomic and population history inference using ancient DNA.*
<http://dx.doi.org/10.15496/publikation-52143>
- 2011 – 2014  **M.Sc. in Microbiology. Universidad Nacional de Colombia**
Thesis title: *Identification of arsenic resistance genes in the metagenome of Bogotá river (Meritorious award)*
- 2005 – 2010  **B.Sc. in Agronomic Engineering. Universidad Nacional de Colombia**

Skills

- Research 
- Expertise in leveraging whole genome information to address questions in population genomics, demographic histories, and phylogenomics across diverse taxa, integrating epidemiological dimensions.
- Application of advanced statistical approaches (Bayesian and frequentist) to genomic, ecological, and epidemiological datasets.
- Proficiency in applying dimensionality reduction and machine learning techniques to extract meaningful insights from complex datasets.
- Use of combined genomic datasets from contemporary, historical, and ancient samples for different evolutionary analyses.
- Laboratory 
- Extensive experience in DNA extraction from various organisms and tissues, including degraded and ancient samples, ensuring high-quality data for genomic studies.
- Proficiency in DNA quantification, quality control, and library preparation for *Next Generation Sequencing* platforms, optimizing workflows for diverse project needs.
- Expertise in clean lab techniques and experimental design for working with historical, archaeological, and environmental samples.
- Background in microbiological techniques, supporting integrative studies on microbiome interactions within biodiversity frameworks.

Awards

- 2025  **Student Choice Awards 2025**
Nominated: Exceptional Feedback. Students' Union, University College London, UK.
- 2023  **Innovation & Impact Awards 2023**
Winner: Improving global crop disease diagnosis to reduce economic loss and improve food security. University of East Anglia, UK.

Teaching experience and supervision

- 2022 – Present  **Course: Methods in Ecology and Evolution 24/25.** Design and delivery of lectures, as well as marking, University College London.
Course: Methods in Ecology and Evolution 23/24. Design and delivery of lectures, as well as marking, University College London.
Course: Methods in Ecology and Evolution 22/23. Assistance in leading computational workshops with students, University College London.
- Jan 2024 – Present  **Methods for phylogenetic analyses in bacterial populations.** Supervision and training PhD student Jiajun Cui, University College London.
- Sep 2022 – Sep 2023  **Course: Plant Ecology and Evolution 22/23.** Assistance leading journal club discussions with students attending the course, University College London.
- Jun – Jul 2022  **Bioinformatic methods to process and authenticate ancient DNA genomic sequences.** Supervision and training of Master student Mattias Sherman, University College London.
- Sep 2021 – Jul 2022  **Methods to detect parallel evolution in pathogenic clonal lineages.** Supervision and training Master student Eva Morisot, University College London.
- Mar 2019  **Molecular methods and protocols to work with herbaria inside clean laboratory facilities.** Training of visiting PhD student Julia M. Kreiner, University of Toronto.

Complementary education and experience

- Apr 21 – 27 2018  **Population Genomics: background and tools.** Sponsored by ELIXIR Italy Training. Naples, Italy.
- Mar 2018  **Plants and associated microbiota field sample and documentation.** Pathodopsis project. Central Spain.
- Sep – Oct 2017  **Herbaria sampling and documentation.** Staatliches Museum für Naturkunde, Stuttgart and University of Tuebingen, Germany.
- Oct 17 – 19 2016  **Population genomic data analysis.** Sponsored by Adaptomics SPP1529. Hohenheim, Germany.
